

How to record your voice for Windows, Mac, Android and iPhone/iPad

We recommend using a computer with a headset attached to it, for example:

If you don't have a headset and you are using the internal microphone of your computer, please be close as possible to the laptop and talk in a clear and loud voice. Please avoid moving when you are recording to prevent volume differences and background noises during your recording.

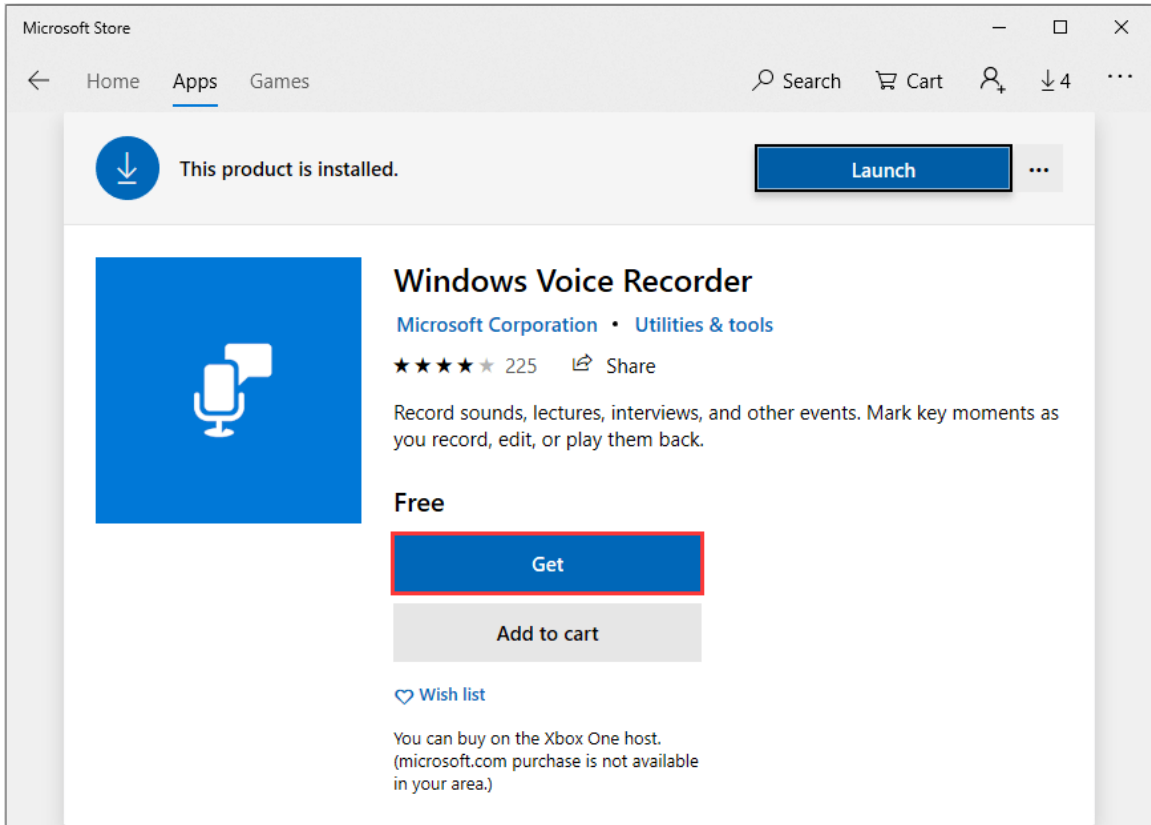

Using a Windows 10 computer to record

Step 1: Click **Start** and then select **Microsoft Store**.

Step 2: Search for **Windows Voice Recorder** and click the app in the search result.

Step 3: Click **Get** to download Voice Recorder. Or you can download the app directly, [Click Here](#).

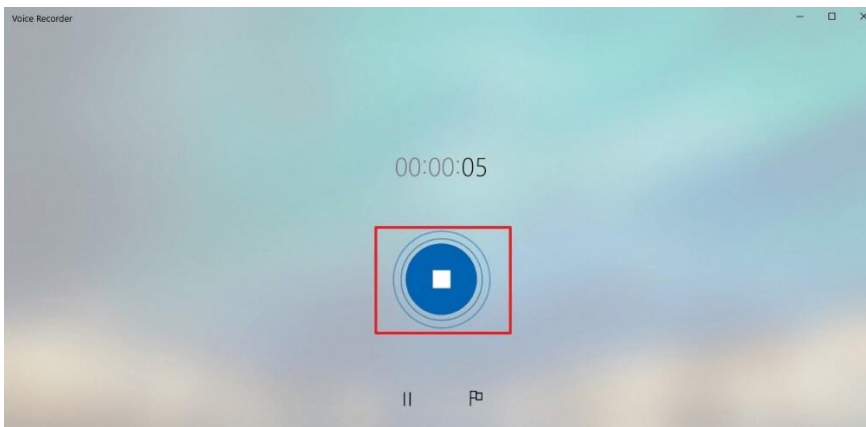

Once you download Voice Recorder, it will be automatically installed. Then you can use it to record audio.

Step 4: To make your vocal recording, first connect a microphone. Click **Start** and type **Voice Recorder** in the search box. Then click on the app to open it.

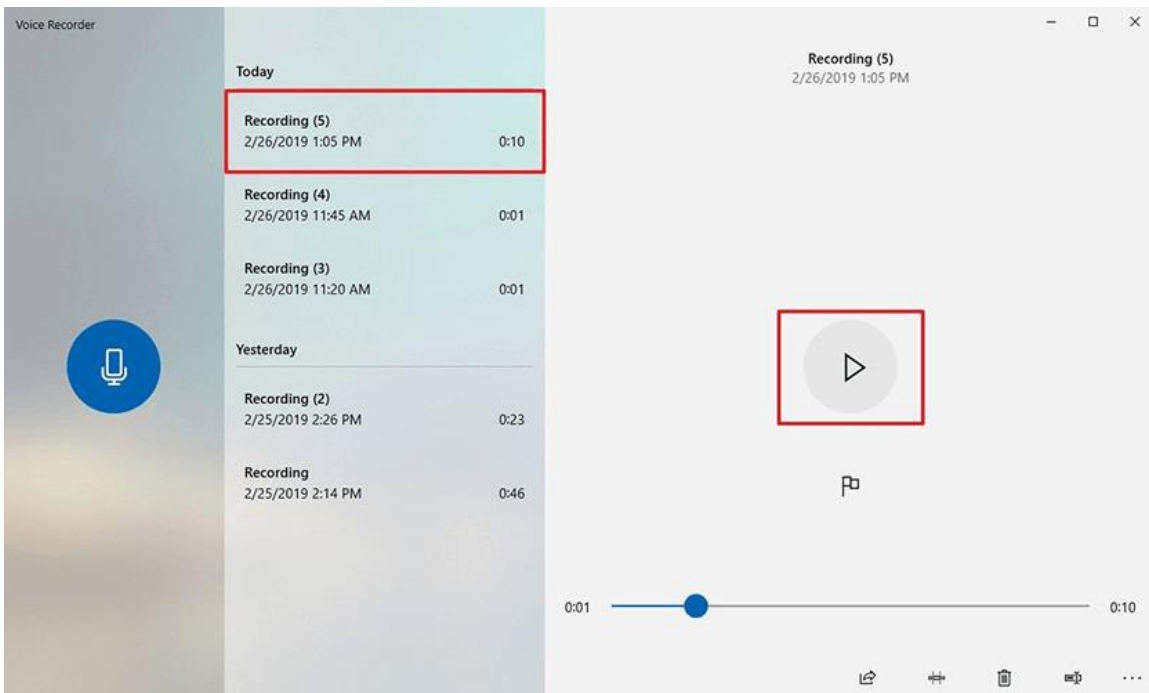

Step 5: Click the **Record** button or press **Ctrl + R** to start recording.

Step 6: Click the **Stop** button to finish recording when you have completed your recording.

Step 7: In Windows Voice Recorder, all recordings will be listed in the **left panel**. If you want to check the audio you have recorded, select it from the panel and click the **Play** button to check your audio recording.

Step 8: The audio file can usually be found stored in the **Documents folder** → **Sound Recording**.

You can also **right click** on the recording in the Voice Recorder app and choose **open file location** to find your audio file.

Using a Mac computer to record

Mac

You can record any audio on a Mac from a microphone with this method, using either a built-in microphone or an external mic.

Step 1: Open **QuickTime Player**, found in the Applications folder.

Step 2: Pull down the **File** menu and choose **New Audio Recording**.

Step 3: Click the red (o) **Record** button to start recording audio from the default microphone source.

When finished, click the same button to stop the audio recording.

Step 4: Go to the **File** menu and select **Save**. Name the file and choose your file location. **Please note that you may NOT save the file name with any characters or symbols – only text.**

Another option for recording in Mac OS can be found here: [Click here](#)

Record with an Android device

This method should be used if the above methods using a computer is not possible.

To record using your phone you can use the app **Voice Recorder**, available for free on Google Play via this link: [Click here](#)

Step 1: Click the recording button to record your voice:

Step 2: After you finish recording, we recommend that you select **Share File** and send it to your own email.

Record with an iPhone/iPad

Step 1: Open the **Voice Memos** app located on the iPhone.

Step 2: Tap the red record button to start recording the voice or audio. When finished, tap the same button again to stop recording.
